## **CERTIFICATE OF COMPLIANCE – Red-Phosphorus-Free Declaration –**

Nexperia B.V. certifies that its semiconductor products are free from any intentionally added elemental phosphorus in the form of the red allotrope. Phosphorus (CAS No. 7723-14-0) may be declared as an alloying constituent within homogeneous materials of Nexperia products, for example in iron or copper alloys of lead frames and clips.

The presence of analytically detectable traces which have possibly been introduced via raw materials, auxiliaries, and additives cannot be excluded.

To facilitate compliance checks and inform the public, we make product composition declarations available on our public website. The signature below verifies that the above statements, including any product composition data, are valid and accurate to the best of our knowledge. Nexperia has implemented robust systems to ensure that our products comply with global environmental regulations and laws. However, we cannot guarantee that all materials in our products have been independently verified regarding their substance content. In the event of any issues arising from information in this document, Nexperia's standard terms and conditions of sale shall apply, unless alternate contracts have been agreed upon in writing by both parties.
